

WONDERFUL SKIN

Restylane
SKINBOOSTERS™

SHOW YOUR SKIN AT ITS BEST

You are wonderful and your skin should reflect your natural wonders within. That's why your skin deserves to be hydrated and nourished, so that it can look its best: fresh, natural and radiant.

Restylane® Skinboosters™ improve the skin's quality by boosting hydration levels deep inside the skin and increasing its smoothness, elasticity and firmness. What you and everyone else will notice is a fresh and invigorated look to your skin.

Here's your opportunity to unlock the secret of lasting deep skin hydration.

WONDERFUL YOU

Restylane
SKINBOOSTERS™

THE WONDERS OF DEEP SKIN HYDRATION

Restylane Skinboosters are a brand new approach to nourishing your skin, especially designed to deliver deep skin hydration. This means increasing hydration levels *within* the skin to deliver lasting moisturisation and improvements on the skin's surface.

The treatment involves hydrating microinjections of a soft, gel-like substance called hyaluronic acid (HA) into the skin, which improves the skin's firmness, elasticity and radiance.

Water-loving HA is found naturally in the body where it maintains hydration in the skin. As we age, the quality of our HA diminishes over time. Now you have the opportunity to replenish and maintain natural hydration levels from within as the stabilised HA in Restylane Skinboosters continues to work over several months.

REACH FOR RADIANCE

Restylane Skinboosters offer a subtle, gradual change in skin quality and elasticity. What you get is a natural but noticeably invigorated look to your skin that others will envy.

Restylane Skinboosters are versatile treatments that can be used:

- + **For men and women of all skin types**
- + **For people with younger or more mature skin**
- + **For the face, lips, neck, hands and décolletage**
- + **For people who want to improve skin structure, e.g. in acne-scarred or photo-damaged skin**

EXPERIENCE THE NATURAL
WONDERS OF LASTING DEEP
SKIN HYDRATION TODAY

SIMPLE STEPS TO WONDERFUL SKIN

Restylane Skinboosters consist of multiple very fine injections into the chosen area of skin in order to gradually improve skin quality and give it a healthy glow. While you may see results after just one treatment, for optimal results we advise that you receive an initial 'start-up' course, usually 3 treatment sessions, 2-4 weeks apart*.

Your body will gradually break down the HA in Restylane Skinboosters over the course of several months.

To sustain your wonderful skin, it is recommended to have regular maintenance treatments, approximately every 6 months.

*Depending on the product used

A TREATMENT YOU CAN TRUST

Restylane Skinboosters are a groundbreaking new treatment developed from the expertise of Restylane®, which has 16 years of research and 15 million treatments to its name since 1996. The effectiveness, action and long-term safety of HA have also been proven in many clinical trials.

YOUR LOOK, YOUR CHOICE

There are several different types of Restylane Skinboosters products to best match your individual needs and skin type.

Restylane Skinboosters can be used as a stand-alone treatment but can also be used in combination with other aesthetic treatments, such as fillers, as desired. Speak to your practitioner who will guide you towards the best product and treatment schedule to achieve what you're looking for.

YOUR GUIDE TO WONDERFUL SKIN

Below are some details of what to expect on the way to hydrated, wonderful skin. Ask your practitioner for any additional details or advice specific to you.

BEFORE TREATMENT

Talk to your practitioner about:

- + Current medication (such as aspirin or anti-coagulants)
- + Immuno-diseases
- + Allergies
- + Previous aesthetic treatments
- + Pregnancy or breast-feeding

DURING TREATMENT

- + On each visit, your practitioner will administer a series of tiny, fine needle, low-volume injections into the mid to deep dermis (the underlying layer) of the skin
- + During the procedure, some people experience a certain level of discomfort. The injected solution may contain a mild anaesthetic or your practitioner may administer a topical anaesthetic prior to the treatment that helps make the treatment more comfortable
- + Each treatment session usually takes around 15-20 minutes

AFTER TREATMENT

- + Following the treatment, you may experience some slight redness or minor bruising around the treatment areas, this should subside after a few days, but in some cases bruising may last for up to 2 weeks
- + Your practitioner may recommend a clean cooling pad to help reduce swelling
- + Avoid applying make-up on your skin immediately after the treatment. After a rest of about 24 hours, if needed, you can use light make-up to cover any redness or bruising
- + Avoid excessive sun or extreme cold at least until any initial swelling/redness resolves

COMPLEMENT YOUR TREATMENT

Enhance the hydrating effects of Restylane Skinboosters with the Restylane skincare line. These skincare products contain the same type of HA found in Restylane Skinboosters to prolong the effects of your treatment, as well as other ingredients to promote hydration, healing and for anti-ageing effects. Restylane skincare products include:

- + Facial Cleanser
- + Day Cream
- + Day Cream SPF 15
- + Night Cream
- + Night Serum
- + Eye Serum
- + Hand Cream
- + Recover Cream (for post treatment)

Your specialist practitioner will provide you with more specific details.
